MCMC Diagnostic Summary

```
======================================================================
CAR MODEL TECHNICAL AUDIT | idata_car_population_v3.nc
Structure: 4 chains | 1500 warmup
======================================================================
PARAMETER    |     MEAN |    R-HAT |   ESS_BULK
----------------------------------------------------------------------
rho          |    0.985 |    1.010 |        593
sigma        |    0.296 |    1.000 |       2280
alpha        |    0.997 |    1.000 |       2882
b0           |   -7.708 |    1.000 |       9458
----------------------------------------------------------------------
STABILITY CHECK: PASS
MAX R-HAT:       1.010
DIVERGENCES:     0
